WORK EXPERIENCE

Skylark Drones UI/ UX Designer (Full-time)

02/2025 - Present

Bengaluru

Achievements/Tasks

- Lead end-to-end product design for Spectra, an AI-powered geospatial SaaS platform for drone-based inspections and analytics used across enterprise infrastructure, energy, and mining clients.
- Partner with PMs, engineering, QA, and operations leadership to shape product strategy, from problem framing and user research to solution design, prototyping, and pre-release validation.
- Designed and launched the inspection insights dashboard, enabling asset managers to monitor thousands of assets with interactive filters and drill-down analytics, reducing time to insight.
- Led the design of an inspection module supporting images, video, and 3D maps with spatial annotations, unifying fragmented workflows into a single reviewer-friendly experience.
- Designed the in-app notification system with context-aware priority logic, driving a 29% lift in user engagement and improving response time on critical inspection alerts.
- Established reusable patterns for the Spectra design system, improving consistency and speeding up engineering handoffs.

UI/ UX Designer iBind Systems: Next-Gen Fintech Solutions

01/2024 - 01/2025

Bengaluru

Achievements/Tasks

- I joined as a founding designer, **owning** the end-to-end design for three core **SaaS** and **B2B** products.
- Led projects end-to-end, ensuring 98% on-time delivery while aligning designs with business goals and user needs.
- Created scalable design systems and components, cutting development time by 30% and ensuring brand consistency.
- Led end-to-end design of responsive websites, boosting accessibility and increasing mobile retention by 40%.
- Awarded "Rookie Rockstar" for outstanding contributions and impactful work.
